

Manufacturing Architecture: An Architect's Guide to Custom Processes, Materials, and Applications by Dana K. Gulling

14.52 MB free download Manufacturing Architecture: An Architect's Guide to Custom Processes, Materials, and Applications book PDF, FB2, EPUB and MOBI. Read online Manufacturing Architecture: An Architect's Guide to Custom Processes, Materials, and Applications which classified as Arts & Photography that has 352 pages.

Manufacturing Architecture: An Architect's Guide to Custom Processes, Materials, and Applications Book Content Preview:

Manufacturing Architecture is the first reference guide to customizing repetitive manufacturing for architects. Computer-aided design has greatly expanded the opportunities for architects to create innovative buildings with custom components. While most architects were exposed to CAD when they were students, few of them have in-depth knowledge or experience with using it to customize repetitive manufacturing processes. This book provides designers of all levels with all the information they need to make the most of the exciting opportunities offered by custom manufacturing. Clear diagrams and narratives explain the 20 most useful manufacturing processes for typical building components. Case studies from around the globe show how these processes can be customized in order to create variation, lower costs, decrease production waste, and use a wider selection of materials. With over 1,000 images, including photographs and hundreds of specially created diagrams, Manufacturing Architecture is as inspiring as it is useful.
