Before the Battlecruiser: The Big Cruiser in the World's Navies, 1865-1910 Book Content Preview:

The battlecruiser is perceived by many as the most glamorous of warships, remembered for its triumphs and tragedies in both world wars. Often forgotten are its lineal ancestors, the big cruisers that were constructed as capital ships for distant waters, as commerce raiders, and as fast scouts for the battle fleet during the last decades of the nineteenth century and the first years of the twentieth. In this new book by bestselling author Aidan Dobson, the 200 or so big cruisers that were built for the world's navies from 1865 are described and analyzed in detail.
